

## Drug Classes and Products Covered for the Maternity Outpatient Medical Services (MOMS) Program Effective May 1, 2018

The Maternity Outpatient Medical Services (MOMS) program covers the drug classes and products that are directly related to the pregnancy or affect the health of the enrollee, through 60 days after the pregnancy ends. In addition to the products listed below, condoms are covered for the prevention of sexually transmitted infection.

**Exceptions:** Prescribers can contact Magellan Medicaid Administration, Inc., Clinical Call Center (1-877-864-9014) to obtain an exception with prior authorization on drug classes and products that are not covered by MOMS Program. Magellan Medicaid Administration, Inc., Clinical Call Center may also approve a seven-day supply of narcotic analgesics. Pain relievers are non-covered otherwise (except for over the counter acetaminophen). Blood glucose strips, lancets and urine testing products for diabetes are covered under the Durable Medical Equipment (DME) benefit.
