

About EnhanceMed

The Michigan Department of Community Health (MDCH) in partnership with Magellan Medicaid Administration is excited to provide additional resources regarding **EnhanceMed** – *A Behavioral Health Consultation Program*.

The goal of **EnhanceMed** is to support providers, like you, to be able to provide expert quality of care when prescribing behavioral health medications to MDCH program beneficiaries. A pilot of prescriber education mailings commenced in May 2012 and the full **EnhanceMed** program, including face-to-face visits with a pharmacist consultant with a specialty background in behavioral health medications, launched September 2012. The past several months MDCH Medical Services Administration staff including [Dr. Debera Eggleston, MD](#), Chief Physician of the Office of Medical Affairs and [Trish O'Keefe, RN, MPA](#), Director of the Pharmacy Management Division have been collaborating with colleagues across the State regarding the launch of this promising program.

Please take a moment to click on the following webinar link for additional background about the program and its success in Maricopa County, Arizona:
